

anti-mold & mildew 強效防霉抗菌包

With this excellent sterilization, we recommend you to try to stop running dehumidifier in the finished product storage for energy saving.

因為PowerPak的長效滅菌 成品倉不需要開除濕機以節省能源

效果可達一年以上

Long-term effectiveness up to 1 year

可生物分解

Biodegradable material

高抗潮

High Moisture Resistance

不變色

Non-discoloration

APPLICATION:

The spores in the air and those attached to the product need to be killed to prevent mold growth. First spray SB-CHOO airflow type anti-fungal agent to kill bacteria in the air, and then put Power Pak into the package to slowly and continuously release natural mustard essential oil to kill mold and ensure that mold does not grow in humid environment.

service@tungsheng.com.tw

MOLD RESISTANCE TEST

防潮測試

on seude leather at a high -humidity condition of 90%RH

on leather in culture dish

長效滅菌,多潮濕都不怕

將飄散在空氣中及已附著在物體上的孢子消除掉才能真正的抑制黴菌增長。 使用SB-CHOO氣相型防霉抗菌劑,釋放後經由空氣流動殺死該空間所有霉孢, 為成品進行第一次消毒滅菌。加上Power Pak強效防霉抗菌包含大量天然芥茉 精油,其緩慢釋放專利技術,打造無菌防霉空間,確保成品在高濕環境中一年內不 發生任何霉變。

於包裝紙上噴 1-2下 CHOO 相式防霉抗菌劑 (用量應視鞋子材料 大小而定)

STEP2.

馬上將盒蓋關上

STEP3.

在完成成品鞋裝箱 , 於外 內放入2-4 包Power Pak (用量應視紙箱大小而定)

STEP4.

完畢

封箱 的防霉效果
